

CONCRETE FINISHER

Concrete Finishers smooth and finish freshly poured concrete. They install, maintain and restore floors, ceilings, sidewalks and roads. They are employed by construction companies, contractors and manufacturers. Some concrete finishers are self-employed, contracting their services for smaller projects.

Program:

Concrete finishers should be in good shape. They read and follow blueprints and instructions and measure and mix substances accurately. It's a good idea to get some general experience in and knowledge about the construction industry, this will help you become familiar with construction methods and procedures. Formal certification as a concrete finisher isn't a requirement. Most employers or unions may require Grade 12.
