

HEALTH & SAFETY COORDINATOR

Health and Safety Representatives help develop, maintain and implement health and safety policies, ensuring they are updated and current with legislation. They evaluate and monitor health and safety hazards and develop strategies to control risks in the workplace. They ensure staff receive training and handle any accidents..

Program:

Workplace Health and Safety course offers a detailed overview of government legislation and organizations' efforts to prevent and control occupational injury and illness. Learn about property damage, security breaches, pollution and product liability. The student will learn safe work practices in offices, industry and construction as well as how to identify and prevent or correct problems associated with occupational safety and health in these locations. The course is designed to assist the student with the implementation of safe healthy practices at work.
